

Your First Visit to Marsh Family Chiropractic

Welcome to Marsh Family Chiropractic!

Have you ever been in a social situation and not know what is going to happen next? During their first visit to a doctor's office, some patients experience apprehension because they don't know what to expect. Here is what you can expect on your first visit to Marsh Family Chiropractic:

Paperwork

When you complete the New Patient Entrance Form, we'll have an excellent understanding of your past and current health situation. The form may seem lengthy at first but most of the questions are "Yes" and "No" answers, so it will go quickly. But, more importantly, the information you provide is crucial for determining the best course of care.

Consultation

Once you've completed your paperwork, you will meet with a doctor and discuss your health concerns. We will find out if you're a good candidate for chiropractic care!

Examination

Following the consultation, the doctor will perform a thorough chiropractic, orthopedic, physical and neurological examination. The purpose of this examination is to locate the cause of your problem so we can develop a plan to help you.

X-Rays

When required, x-rays will be taken to get a closer look at the potential cause of your problem. We have a complete x-ray facility on premises. You do not have to be referred out to have these taken.

Finances

If you have any questions or concerns regarding clinic charges, please ask Karen and she will be happy to assist you!

We encourage you to ask questions today and at any other time. Our goal is to make your visits to Marsh Family Chiropractic the most effective, efficient, enjoyable health care experience you could have on your "road back to health".
